

CASTELLO

excavation & grading, inc.

We have the ability to perform as a sub-contractor on various projects but also as a general contractor with the ability to oversee all areas of site development.

We save the developer numerous headaches and give them one point of contact and the ability to immediately resolve any issues that may arise.

Castello Excavation & Grading can take a raw piece of land for a developer working from the permit process through grading, then overseeing all utilities, curb and gutter work through the final stages of paving, presenting a turn key operation of site work that is ready to go vertical.

Castello Excavation & Grading, Inc. has assembled an experienced team of Project Managers, Superintendents, Forman and Operators with over 100 years of combined experience.

HANDS ON MANAGEMENT:

What sets Castello Excavation & Grading apart from other companies is not only our ability to guide our projects via experienced Superintendents and Project Managers but also the unique ability for our customers to deal direct with the owners. This hands on management gives our customers the ability to get a quick resolution to any problems that arise during any stage of construction.
